SONY

Planned software update for 3D BDP-S570

Later this year, Sony plans to issue a software update for Sony BDPS570 (Sears# 57-57260) player which will allow the product to playback 3D Blu-ray Disc titles.

This enhancement will be delivered automatically & without charge to your player over the internet through Sony's network download service.

After the update, you can enjoy 3D contents & services while you are playing a 3D capable disc,but please note:

To experience 3D content a 3D ready HDTV, 3D glasses & emitter are also required, together with the appropriate 3D glasses.

Any standard Blu-ray Disc titles will continue to playback normally on this device following the update. If you do not wish to connect your player to the the internet,you can still update the software following the instructions at the bellow web address.

For further information about product updates please visit: **Sears.com** or see an associate for more details.
