

WE PERFECTED FRONT-LOAD LAUNDRY YEARS AGO

Now, it's time to add some flash

We'd like to introduce you to the new Frigidaire® Affinity laundry pairs from Electrolux®, the world's largest manufacturer of front-load laundry for 70 years. You'll know Affinity washers and dryers when you see them, because they feature cool chrome accents on the doors. Inside, you'll find other features that are hard to find at this price—all backed by Frigidaire's reputation for solid dependability. And they look pretty good in your laundry room, too.

THE FEATURES YOU NEED

Deep Clean Sanitary Cycle

Anyone who has children or pets know how important it is to get laundry completely clean. The Deep Clean Sanitary Cycle uses an internal heater to boost water temperatures up to 152° F. It allows for a deeper clean and can kill 99.9% of four common infectious bacteria.

Advanced Rinsing Technology (ART)

Fresh rinse water bypasses the detergent dispenser and showers down on clothes to thoroughly remove any residue, leaving you with the whitest whites, brighter colors and fresher feeling clothes.

Internal 1,000 Watt Heater

The Affinity 8000 washer uses an internal heater to maintain the optimal temperature in every cycle, from cold wash to the high-heat used in Deep Clean Sanitary Cycle. It maintains constant water temperatures throughout each cycle, maximizing your detergent's cleaning power and giving you cleaner, brighter clothes.

Stainless Steel Interiors

Affinity front loads feature gorgeous stainless steel inside both the washer and dryer. Stainless steel is strong, and won't warp or pull on clothes. It also repels mold and bacteria for superior cleaning.

King-Sized Capacity

The washer features 3.5 IEC cu. ft. of space, while the dryer has a full 5.8 cu. ft. That's enough to wash two loads at once—even bulky comforters—so you'll spend less time doing laundry.

You'll even want to put them on a pedestal.

Bend over less with these optional pedestal storage drawers. They allow you to raise your washer and dryer a full 15" off the floor, and provide an excellent spot to store laundry essentials. Available in all 3 colors.

Efficient and Eco-friendly

High-efficiency front-load washers on average use only one quarter the amount of water used in a conventional washer. Detergent is used more efficiently, and less water is used. And, because less water is used, less water is heated, which can reduce your energy consumption.

Energy Star® Rating

These washers reduce annual energy usage up to 82% and use up to 66% less water so detergent can work more effectively.

For more information visit sears.com or frigidaire.com

Yes, they're pretty. But the real story is what's inside.

Frigidaire® Affinity laundry pairs will improve the look of your laundry room. But you won't believe how much they will improve the look of your laundry.
